INTEREST CALCULATION

If the cardholders does not pay total amount due on due date (as reflected in the monthly billing statement), then such account will be considered as revolving account.

In this scenario, entire outstanding amount would attract finance charges and all new transactions will also attract finance charges, till such time as the previous outstanding amount is paid in full.

The following would serve as an example for this. Actual calculation would vary from one cardholder to another based on the cardholders purchase and revolving behaviour.

Assume all previous dues are paid in full and there is no outstanding in your credit card account.

Statement date is 15th of every month. Below are the transactions in the account.

July 20	At M/s ABC Ltd	Nu 10000/-
Aug 15	Statement Date	Total Amt due = Nu 10000/- Min Amt due = Nu 2500 (25% of total amt due) Payment due date Aug 30
Sep 05	Payment recvd	Nu 2000/- (Late payment, hence will attract late payment charges)
Sep 10	At M/s XYZ	Nu 1000/-
Sep 12	Payment recvd	Nu 5000/-

Therefore on the statement dated Sep 15th, following will be the charges payable interest rate 2.5% p.m.

Interest calculated = outstanding amt * 2.5% * no. of days * 12/365
 Interest on Nu 10000/- from July 20 to Sep 5(47 days) = Nu 386.30
 Interest on Nu 8000/- from Sep 06 to Sep 12 (7 days) = Nu 46.03
 Interest on Nu 3000/- from Sep 13 to Sep 15 (3 days) = Nu 7.40
 Interest on Nu 1000/- from Sep 10 to Sep 15 (5 days) = Nu 4.11

Total Interest Payments = Nu 443.84

Late Payment charges = Nu 200 (0.5% of outstanding or min Nu 200 whichever is higher)

Card Skimming

'Card skimming' is the illegal copying of information from the magnetic strip of a credit or ATM card.

The scammers try to steal card details so they can access customer's accounts. Once scammers have skimmed card, they can create a fake or 'cloned' card with original card details on it. The scammer then uses the cloned card and run up charges on customer account.

Warning Signs

- A shop assistant takes your card out of your sight in order to process your transaction.
- You are asked to swipe your card through more than one machine.
- You see a shop assistant swipe the card through a different machine to the one you used.
- You notice something suspicious about the card slot on an ATM (e.g. an attached device).
- You notice unusual or unauthorised transactions on your account or credit card statement.

Protect yourself from Card Skimming

- Keep your credit card and ATM cards safe. Do not share your personal identity number (PIN) with anyone. Do not keep any written copy of your PIN with the card.
- Check your bank account and credit card statements when you get them. If you see a transaction you cannot explain, report it to Bank of Bhutan Ltd. immediately
- Choose passwords that would be difficult for anyone else to guess.
- Shop only at site you trust.
- Don't make online credit card purchases from a public place.
- Protect your computer from viruses and hackers.

Limit and Velocity Checks on Transactions

Bank of Bhutan Ltd. credit card system has in-built features to perform Velocity Checks to help prevent fraud; this feature puts a limit on daily transaction of a particular type, say air ticketing, online transaction, etc. The limit would be on number of transactions, as well as on total amount of transaction. If the transactions exceed these parameters, further transaction of that type will be rejected. This added security safeguard feature provides basic protection to cardholders in case of lost or stolen card.

Bank also has restriction on daily limit on the credit card usage to prevent high amount lost in case of the fraud transactions.

However, these restrictions and velocity checks can be by-passed at cardholder's own risk on written intimation to the BANK and BANK shall not be responsible for any loss due to this. For details of these limits, please contact with Cards Division.
